

October 29, 2004

I want national radio to stay as it is because my family and at my work, we listen to K-Love station which is broadcasted national and regionally. This station is very important to me and many of my friends listen to it and if they don't we tell them about it and they usually end up having it on all the time. It is very important to our community. It keeps us up with news, good health and fulfilling music. I happen to be in an area, Wimberley, Texas, which does not get real good reception on some stations like it was in Austin, Texas. But I can get K-Love 106.3 FM, here and it is playing continuously.

Many of our teens listen to K-Love, Christian Station, because it is contemporary Christian music that a lot of kids and adults enjoy. I would feel that my children would be not getting the uplifting and encouraging music that they need to hear if you change the way FM radio translates and we will not be able to get this station anymore. Please do not take this away from me, my family and my community. I play this station all day long at my Photography Studio. And it brings enjoyment to my clients, they always comment on how nice it is to get a good nation wide station like K-Love on the radio. Please do not take this away from us.

Thank you for reading and considering my comments to keep the FM radio the way that it is.

Sincerely Concerned,

Diane Therrien
